

Primex Notify™ for Schools:

Alerts, Messages, and Communications — Visualized

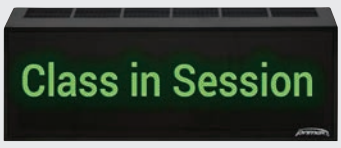

In an emergency, every second matters. Alerting students and staff within seconds of an unfolding event could save lives. Primex Notify™ InfoBoard™ Displays quickly inform people of emergencies, allowing them to reach safety sooner.

Ideal for any school environment, from elementary and high schools to college campuses, these easy-to-read, digital displays provide critical notifications, general messaging, and synchronized time to keep students and staff safe, in the know, and on time.

Primex Notify bolsters your safety, communication, and timeliness efforts throughout your entire school or campus.

Increase Safety, Communication, and Timeliness at Your School

Primex Notify™ InfoBoard™ Displays can convey information of all kinds to your student body. These bright LED boards can be read at a distance and display preset messages such as “Lockdown,” “Evacuate,” or “Weather” to signal a critical event or weather emergency. In addition, the InfoBoard Displays can:

- Act as a communication solution in loud environments where audio announcements usually go unheard
- Create a more inclusive learning environment by relaying messages to those who are deaf or hard of hearing
- Provide an “All Clear” message to let students and staff know the critical event has ended

“If we have a critical incident on campus, it’s important for us to complete an after-action report. We can use OneVue to print out an event history report.”

— John Stangler, Safety Coordinator and Director of Buildings and Grounds, Pewaukee School District

Additional Primex Notify Benefits

Mass Notification Made Easy

When paired with the mobile-friendly, cloud-based OneVue® Software platform, InfoBoard Displays can show customized messages to inform, congratulate, or direct.

Bell Controller Integration

Integrate with your existing PA system to easily manage bell schedules on the same software platform as your InfoBoard Displays to keep students, teachers, and staff on schedule.

Hallway Countdown Timers

Give students the knowledge of exactly how much time remains before their next class starts, relieving hallway congestion and increasing learning time.

Color Customization

Choose to convey messages in seven different colors, which allows for a color-coded alert system that is accessible for those who cannot read.

The Same, Synchronous Time

InfoBoard Displays show synchronized times and dates when not conveying messages to keep students, teachers, staff, and visitors on time.

Automated Historical Data

The OneVue Software automatically logs every sent message and its duration to make for easy post-incident reporting and review.
