

Standardize operations,
protect against compliance risks,
and **increase efficiency** across every
department with a resilient, network-
based synchronized time system.

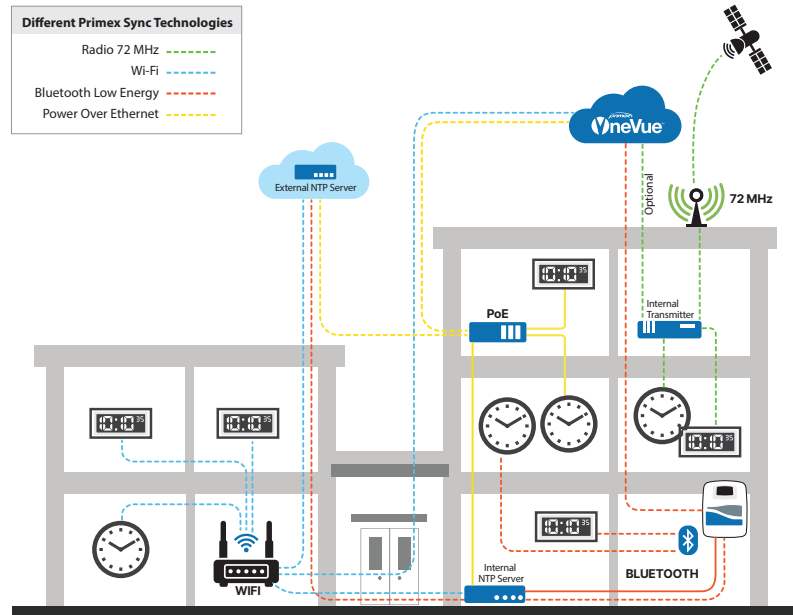

Synchronized clocks help accurately document coded events, increase appointment and surgical on-time starts, assist with medication administration, and help staff stay on time.

Primex Sync™ delivers precise, hospitalwide time using the technology that best fits your facility.

Radio 72 MHz, Wi-Fi, Bluetooth® Low Energy, or Power over Ethernet

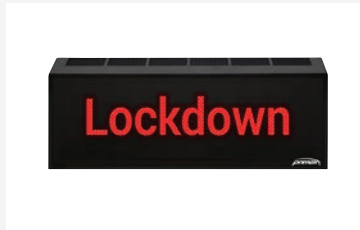

- Use our patented Radio 72 MHz solution, engineered for unrivaled signal strength, guaranteed coverage, and reliability for stand-alone schools to sprawling college campuses.
- Leverage Wi-Fi or a Bluetooth® Low-Energy mesh network for fast, seamless installation where cabling is prohibitive.
- Choose Power over Ethernet (PoE) for a secure, wired option that delivers both power and time over existing or new cable.

With Primex Sync, you gain more than synchronized time; you gain efficiency, confidence, and peace of mind. This solution helps hospitals and health systems run smoothly and stay precisely aligned every second of every day. Discover how accurate timekeeping can transform the way your healthcare facility works with Primex Sync.

Code Blue Timers

Primex Sync™ Code Blue Timers integrate with existing Code Blue systems to effectively track timing for each event. Precise Code Blue event timing helps hospital staff stay within recommended treatment guidelines and deliver optimal patient outcomes.

Primex Notify™ Visual Alerts

Primex Notify InfoBoard™ Displays add a visual layer to emergency preparedness plans by showing critical alerts at the press of a button. The cloud-based OneVue® Software platform allows for message customization and quick post-incident review for compliance proof.

Crash Cart Kit

Primex Crash Cart Kits include a digital clock and universal installation kit to ensure synchronous time is visible on crash carts. This digital clock display can act as a code blue, count-up, or countdown timer, allowing for precise timekeeping when seconds matter most.

Being on time matters.

Whether you're about to begin an operation, tracking critical care timelines, or keeping on-time appointments, you need to be punctual.

Synchronized time can help you – and the people around you – stay on schedule.

A variety of clock styles, mounting options, and configurations are available to fit the aesthetic and functional needs of your hospital.

Analog Clocks

Dependable Primex Sync analog clocks come in a variety of colors, sizes, and dial options to fit any style or budget. Custom faceplates are available to include hospital logos or branding.

Digital Clocks and Timers

Adjustable LED brightness, a sleek design, and flush-mount options make Primex Sync digital clocks and timers as attractive as they are functional. Enable a count-up or countdown timer to track elapsed time for code blue or other time-sensitive events.

Critical Notifications with Primex Notify™ InfoBoard™ Displays

Primex Notify InfoBoard Displays work seamlessly with the Primex Sync platform to display not only synchronized date and time, but also visual notifications and customized messages. These bright, easy-to-read LED displays enhance facilitywide cohesion and can:

- Deliver critical notifications in seconds
- Show custom messages to inform, direct, and note schedule changes
- Communicate in noisy environments and to deaf or hard-of-hearing individuals

Why Primex?

Primex Sync™ makes synchronized time simple by combining powerful technologies, easy deployment, and long-term reliability. The robust cloud-based OneVue® software platform enables remote monitoring and simple system expansion to include critical visual messaging with Primex Notify™.

Flexible Time Synchronization

Primex Sync offers four different time synchronization technologies to fit any facility, from small community hospitals to sprawling healthcare campuses.

Customization

Submit your hospital or healthcare system logo to prominently display your branding on analog clock dials.

Automatic Time Changes

All Primex Sync clocks update automatically after daylight saving time shifts and resynchronize after power outages.

Power Options

Primex Sync clocks can be battery powered, AC powered, or receive Power over Ethernet (PoE).

Interfacing with Other Systems

Primex Sync integrates into existing public address and life safety systems.

Peace of Mind

Primex Sync Radio 72 MHz transmitters and clocks come with a 5-year standard warranty, and the Radio 72 MHz and Wi-Fi solutions come with a signal coverage guarantee.

"Of all the systems we looked at, we immediately knew that Primex Wireless was the best one for our needs, and they have not let us down. The system works great, and we loved the way it synchronizes through our existing network."
