

# Code Blue Timer Kit

72 MHz, Bluetooth® Low Energy, Wi-Fi,  
and Power over Ethernet Platforms

Our Code Blue Timer Kit converts a Primex LEVO Series Digital Clock, purchased separately, into a Code Blue Timer. When every second counts during a Code Blue event, your team needs to be able to rely on the accuracy of the clocks in every department. The Levo Series Code Blue Timer kit enables our clock to function as a Code Blue timer that integrates with the existing facility Code Blue system to effectively time each event. The timer provides precise Code Blue event timing to help your team stay within recommended treatment guidelines and deliver optimal patient outcomes.

## Reliability You Can Trust

When a Code Blue event is invoked in your facility, a relay/pulse is sent from your Code Blue system to the timer, triggering it to begin counting up. A Code Blue event takes priority over any other timing task – however other tasks will run in the background until the Code Blue function is stopped. The included switch control allows the user to operate the timer in multiple modes during a Code Blue event.

### CODE BLUE TIMER KIT\*

PART NO.	DESCRIPTION
199-000103	Code Blue Timer Kit*, English

\* Digital Clock needs to be purchased separately, retrofit existing LEVO clocks

Code Blue Timer Kit

## CODE BLUE TIMER KIT

- Includes Timer Switch Assembly, Sync Code Blue Cable, and 25' Control Cable

Timer Switch Control

### AUDIBLE TONE OPTION
